

# Little Stoke Primary Schools Science Principles

Science is best when...

We are excited, enthusiastic and engaged in our learning.

We ask questions to support our knowledge and learning.

We take part in practical, hands on experiments.

Everyone can and does take part.

We are given the opportunity to discover new things.

We predict, plan and test our ideas.

We explore Science which is relevant to our own world.

We work collaboratively to support each other as well as independently.

We learn new scientific language to describe.

We can talk about what we have learnt.

We do science inside and outside.
