

## MATHEMATICS

**As Mathematicians**, we will be focusing on place value within 20 representing, comparing and ordering numbers. Additionally, we will learn to use different strategies for addition and subtraction within 20 using practical equipment such as number lines, tens frames and part-whole plates.

## ENGLISH

**As Writers**, we will be using Jack and the Beanstalk and A walk In London to inspire us. We will focus on consolidating the objectives that we have covered so far, sequencing sentences to form short narratives and beginning to use question marks.

## ART/DI

**As Artists and designers**, we will be used what we have learnt in Autumn term to help us make our play projects even better in the creative area of our classroom!

## SCIENCE

**As Scientists**, we will be focusing on materials. We will learn that objects are made out of a range of materials and understand why they are used. Additionally, we will describe, group and compare different materials and objects according to their properties.

# Year 1 Term 3 Capital Q

## Enhanced Provision (EP)

The children in Year One are very lucky as they can now access EP both inside and outside of the classroom thanks to our marquee. When not working with an adult they have various play based activities they can complete linked to their prior learning. It is amazing to see them learning through play independently. **To ensure this continues to work well, please make sure your child has appropriate clothing for cold weather with them in school e.g. thick coat, jumper, hat, scarf and gloves. Thank you!**

## P.E (Tuesday and Friday)

**As Athletes**, we will be focusing on both dance and gymnastics this half term. Please make sure PE kits are worn to school every Tuesday and Friday.

## READING

**As Readers**, we will continue to learn Phase 5 phonics sounds, as well as recapping our prior phonics knowledge. We will be focusing on fluency and being able to decode 90% of the words on the page. We will discuss what is happening in the books we read and make simple inferences.

## Theme

**As Geographers**, we will learn about the different features in Little Stoke and recognise these on a map. We will then compare Little Stoke to Bristol and London and conduct research on London's main attractions. We will use this knowledge to help us with our writing!

**As Historians**, we will begin to look at how toys have changed over time.

## HOMEWORK

To support your children at home, please continue to read with them 3 times a week to improve their fluency. Every time you read please record this in their reading record as the children now receive a certificate for every 20 reads recorded! The children also have access to Numbots and again receive certificates for the hard work they put into this at home. Also please keep completing the activities linked to the Children's University to help the children graduate.

**Thank you for all your support so far! Miss Huck.**
